

Fragrance for diptyque is an invitation to travel.

Christiane Montadre-Gautrot, Desmond Knox-Leet and Yves Coueslant, the founders of the Maison, shared the same sources of inspiration: nature and the memories of past journeys. Paris was where the diptyque story began, Hanoi shaped Yves Coueslant's childhood, Melies in Greece was their home for several summers and Venice was quite simply a revelation. These journeys and the scents they discovered along the way gave rise to authentic fragrances conceived as olfactory landscapes.

diptyque invites you to discover these destinations and to explore new ones through the perfume filled travel spray, a nomadic bottle to personalize, time and again, and to keep through adventures.

1- Closed position

2- **Spray position:** twist the upper part slightly to the right to spritz.

Fill the travel spray

We recommend you fill the travel spray only when completely empty. If not empty, keep the spray away from the eyes when opening.

3- Put in the spray position. Press the push button and hold as you turn the upper part to the right and remove it.

4- Remove the cap and spray nozzle from your perfume bottle (50ml, 75ml, 100ml) to expose the plastic interior.

5- Fit the plastic nozzle of the travel spray over the plastic tube of the perfume bottle. Lightly press the travel spray downwards onto the perfume bottle repeatedly to gradually fill (approximately 100 presses or one minute to completely fill). A small drop is released once the spray is full.

Return the cap on the travel spray and twist to the left to close. It is ready for use.

Personalize the travel spray

6- Unscrew the base by turning it to the left.

7- Slide down the squares of the section to personalize and replace with nine squares of your choice. Re-screw the base. Use all nine squares: if the word has fewer than nine letters, use black squares to add spaces. Before personalization, this section displays the fill level.
